Contents

Preface ix

Keynote Address

100 Years of Research on 'Turbellaria'
by R.M. Rieger 1–27

Behaviour and Ecology

Warning colouration in pseudocerotid flatworms (Platyhelminthes, Polycladida). A preliminary study
by H.P. Ang & L.J. Newman 29–33
Behavior of the rhabdocoel flatworm *Mesostoma ehrenbergii* in prey capture and feeding
by F.J. Wrona & H. Koopowitz 35–40
Spatial and temporal patterns of platyhelminth assemblages in intertidal sediments of northeast Australia
by S. Dittmann 41–47
Abstracts Section 49–50

Morphology and Systematics

Patterns of musculature as taxonomic characters for the Turbellaria Acoela
by S. Tyler & G.S. Hyra 51–59
Two new species of the genus *Anonymus* from New Zealand (Polycladida, Cotylea)
by J.J. Holleman 61–67
A new species of giant planarian from Lake Baikal, with some remarks on character states in the Dendrocoelidae (Platyhelminthes, Tricladida, Paludicola)
by R. Sluys, O.A. Timoshkin & M. Kawakatsu 69–75
Selected characters of the copulatory organs in the land planarian family Bipaliidae and their taxonomic significance (Tricladida: Terricola)
by R.E. Ogren & R. Sluys 77–82
The role of the atrial diverticulum in the copulatory apparatus of the terrestrial flatworm *Platydemus manokwari* de Beauchamp (Tricladida: Terricola)
by L. Winsor 83–89

The proposed synonymy of *Parakontikia ventrolineata* (Dendy, 1892) and *Kontikia mexicana* (Hyman, 1939): what is a penis papilla?
by H.D. Jones, P.M. Johns & L. Winsor 91–96
A cladistic re-assessment of the *Polycystis* species complex (Polycystididae, Eukalyptorhynchia)
by T.J. Artois & E.R. Schockaert 97–102
Abstract Section 103

Development and Regeneration

Proportion regulation in the planarian, *Dugesia tigrina* following regeneration of structures
by R.W. Mead & J. Christman 105–109
Inhibition of regeneration in the planarian *Dugesia polychroa* (Schmidt) by treatment with magnesium chloride: a morphological study of wound closure. Inhibition of regeneration in planarian
by W. Schürmann & R. Peter 111–116
Separation and subtyping of planarian neoblasts by density-gradient centrifugation and staining
by W. Schürmann, S. Betz & R. Peter 117–124
Synchronous and early activation of planarian Hox genes and the re-specification of body axes during regeneration in *Dugesia (G.) tigrina* (Turbellaria; Tricladida)
by J.R. Bayascas, E. Castillo, A.M. Muñoz-Mármol, J. Baguñà & E. Saló 125–130
A fine structural study of regeneration after fission in the planarian *Dugesia japonica*
by I. Hori & Y. Kishida 131–136
Abstract Section 137

Molecular Biology and Neurology

Repeated DNA elements in planarians of the *Dugesia gonocephala* group (Platyhelminthes, Tricladida)
by R. Batistoni, C. Filippi, A. Salvetti, M. Cardelli & P. Deri 139–146
Flatworm phylogeny from partial 18S rDNA sequences
by U. Jondelius 147–154
A phylogeny of the Platyhelminthes: towards a total-evidence solution
by D.T.J. Littlewood, R.A. Bray & K.A. Clough 155–160
Nitric oxide synthase in parasitic and free-living flatworms
by M.K.S. Gustafsson, A.M. Lindholm, K. Mäntylä, M. Reuter, C.A. Lundström & N. Terenina 161–166
The nervous system of Tricladida. IV. Neuroanatomy of *Planaria torva* (Paludicola, Planaridae): an immunocytochemical study
by K. Mäntylä, D.W. Halton, M. Reuter, A.G. Maule, P. Lindroos, C. Shaw & M.K.S. Gustafsson 167–173

Organization of the Orthogon – main and minor nerve cords
by M. Reuter, K. Mäntylä & M.K.S. Gustafsson 175–182
Immunohistochemical detection of opsins in turbellarians
by H. Orii, T. Katayama, T. Sakurai, K. Agata & K. Watanabe 183–187
Abstracts Section 189–190

Ultrastructure

Ultrastructure of muscle cells from a few selected turbellarians: possible correlations between form and function
by M. Silveira 191–196
Is the sperm type of the Nemertodermatida close to that of the ancestral Platyhelminthes?
by K. Lundin & J. Hendelberg 197–205
Acoel spermatozoa: ultrastructure and immunocytochemistry of tubulin
by O.I. Raikova, L.P. Flyatchinskaya & J.-L. Justine 207–214
Ultrastructure of the female gonad of two temnocephalids (Platyhelminthes, Rhabdocoela)
by A. Falleni, P. Lucchesi & V. Gremigni 215–226
Ultrastructural observations on the development of male gametes in *Allostoma* sp. (Platyhelminthes, Prolecithophora)
by A. Lanfranchi 227–233
Characters of the female gonad and the phylogeny of Platyhelminthes
by V. Gremigni & A. Falleni 235–242
Abstract Section 243

Symbiotic Flatworms

Notentera ivanovi Joffe et al., 1997: a contribution to the question of phylogenetic relationships between 'turbellarians' and the parasitic Platyhelminthes (Neodermata)
by B.I. Joffe & E.E. Kornakova 245–250
Morphology and development of the haptors among the Monocotylidae (Monogenea)
by L.A. Chisholm & I.D. Whittington 251–261
On the phylogeny of families and genera within the Temnocephalida
by B.I. Joffe, L.R.G. Cannon & E.R. Schockaert 263–268
Distribution patterns of Temnocephalids commensal with Crustacea and Mollusca from Argentina
by M.C. Damborenea 269–274
Abstracts Section 275–276

Karyology, Biogeography and Distribution

Reproductive modes, ploidy distribution, and supernumerary chromosome frequencies of the flatworm *Polycelis nigra* (Platyhelminthes: Tricladida)
by L.W. Beukeboom, T.F. Sharbel & N.K. Michiels 277–285

The *Gyratrix hermaphroditus* species complex (Kalyptorhynchia: Polycystididae) in marine habitats of eastern Australia
by M. Curini-Galletti & I. Puccinelli 287–298

Old and new records of turbellarians from the central areas of Spain
by J. Gamo & C. Noreña-Janssen 299–305

The geographical distribution of *Polycelis (Polycelis) sapporo* and *Seidlia schmidti* in the Far East
by M. Kawakatsu & O.A. Timoshkin 307–313

Chromosomes of *Phagocata kawakatsui* and *Bdellocephala annandalei* from Lake Biwa-ko in Honshú, central Japan
by I. Oki, S. Tamura, M. Nishino, M. Takai, K.D. Kuznedelov, O.A. Timoshkin & M. Kawakatsu 315–320

Karyology and biogeography of *Dugesia japonica* and *Dugesia ryukyuensis* in Kyúshú, southern Japan
by S. Tamura, K. Yamamoto, M. Takai, I. Oki & M. Kawakatsu 321–327

Abstracts Section 329–330
